

Data Protection Policy

The Data Protection Act 1998 is the law that protects personal privacy and upholds individual's rights. It applies to anyone who handles or has access to people's personal data.

This policy is intended to ensure that personal information is dealt with properly and securely and in accordance with the Data Protection Act. It will apply to information regardless of the way it is used, recorded and stored and whether it is held in paper files or electronically.

1. Scope of the Policy

Personal information is any information that relates to a living individual who can be identified from the information. This includes any expression of opinion about an individual and intentions towards an individual. It also applies to personal data held visually in photographs or video clips (including CCTV) or as sound recordings.

HRAEN collects personal data of people requesting membership of the network.

2. The Eight Principles

The Act is based on eight data protection principles, or rules for 'good information handling'.

1. Data must be processed fairly and lawfully.
2. Personal data shall be obtained only for one or more specific and lawful purposes.
3. Personal data shall be adequate, relevant and not excessive in relation to the purpose(s) for which they are processed.
4. Personal data shall be accurate and where necessary kept up to date.
5. Personal data processed for any purpose(s) shall not be kept for longer than is necessary for that purpose.
6. Personal data shall be processed in accordance with the rights of data subjects under the 1998 Data Protection Act.
7. Appropriate technical and organisational measures shall be taken against unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data.
8. Personal data shall not be transferred to a country outside the EEA, unless that country or territory ensures an adequate level of protection for the rights and freedoms of data subjects in relation to the processing of personal data.

3. Our Responsibilities

We will:

Manage and process personal data properly
Protect the individuals right to privacy
Provide an individual with access to all personal data held on them.

3.2 HRAEN has a legal responsibility to comply with the Act.

Data Controllers are people or organisations who hold and use personal information. They decide how and why the information is used and have a responsibility to establish workplace practices and policies that are in line with the Act.

3.3 HRAEN is required to 'notify' the Information Commissioner of the processing of personal data.

3.4 The Trustees have to comply with the Act when managing that information.

3.5 The Festival is committed to maintaining the eight principles at all times. This means that the Festival will:

- Inform Data Subjects why they need their personal information, how they will use it and with whom it may be shared. This is known as a Privacy Notice.
- Check the quality and accuracy of the information held.
- Apply the records management policies and procedures to ensure that information is not held longer than is necessary.
- Ensure that when information is authorised for disposal it is done appropriately.
- Ensure appropriate security measures are in place to safeguard personal information whether that is held in paper files or on a computer system.
- Only share personal information with others when it is necessary and legally appropriate to do so.
- Set out clear procedures for responding to requests for access to personal information known as subject access in the Data Protection Act.

This policy will be updated as necessary to reflect best practice or amendments made to the Data Protection Act 1998.
